Chapter 7: Principles of Medication Administration and ...

The circular flow of income or circular flow is a model of the economy in which the major exchanges are represented as flows of money, goods and services, etc. between economic agents. The flows of money and goods exchanged in a closed circuit correspond in value, but run in the opposite direction. The circular flow analysis is the basis of national accounts and hence of macroeconomics.

This is perhaps the most important microeconomic concept that you will come across in your initial studies of economics.. The key is to understand the formula for calculating the coefficient of price elasticity, the factors that affect elasticity and also why elasticity is important for businesses when setting their prices.
